Profile

AI systems builder focused on automation workflows, internal tooling and full-stack product development. I design and build AI-supported digital systems from idea to deployment using modern web technologies, automation platforms and API-driven architectures.

Core Capabilities

- AI & Automation: n8n, OpenAI API, Anthropic API, workflow orchestration
- Frontend Engineering: Next.js, React, TypeScript, Tailwind CSS
- Backend & Infrastructure: Node.js, Express, PostgreSQL, Prisma, Supabase
- Tooling & Delivery: Git, Docker, Postman, Vercel
- Languages: Turkish, German , English

AI Automation Pipeline

Built automation workflows integrating Claude, OpenAI, WhatsApp, Google Sheets and custom APIs.

Portfolio Hub

Designed and developed a multilingual portfolio platform using Next.js, TypeScript and Tailwind CSS.

Free Book Pickup Platform

Built a client-facing request platform for managing free book pickup operations.

Experience

Freelance AI Automation & Full-Stack Developer | 2025 — Present

Building AI-supported products, automation systems and internal tooling.

Medrese & Arabic Teacher | 2013 — 2024

10+ years teaching Arabic and classical Islamic studies in structured educational environments.

Education

Associate Degree in Computer Programming — Atatürk University — 2025
